MOVEit Data Breaches Abundant

9/30/2023

Reuters has reported that more than 600 organizations worldwide have suffered data compromise due to a breach of software maker Progress Software's MOVEit file transfer application. "The tallies show that nearly 40 million people have been affected so far by the hack of Progress' MOVEit Transfer file management program. Now the digital extortionists involved, a group named "cl0p", have become increasingly aggressive about thrusting their data into the public domain." Health care providers are among the thousands of companies affected.
