Proposed Legislation Would Require the Creation of DOH Website on Reproductive Rights

Assembly Bill 4829, introduced in the New Jersey Senate on October 24, 2022, would require the New Jersey Department of Health (DOH) to create a website with information on reproductive rights. The website would be required to include comprehensive information on women's reproductive rights under federal and state law and under health insurance plans, including the right to emergency care; birth control; hyperlinks to websites that register the uninsured for health care benefits; and information on where and how to file a complaint if rights are violated.
